

SEMI AUTO TABLE TYPE SEALING MACHINE

STANDARD FEATURES

- .Stainless steel frame, a low-maintenance, compact design.
- .Digital control panel with microcomputer program which allows different machine settings.
- .Quick Interchangeable Mould / Tooling

OPTIONAL

- .Date Printer / Coder (hot stamping type)

VACUUM & MAP SEALING MACHINE

FEATURES

- .Program logic control system and touch screen.
- .Modify atmosphere packaging(MAP) by vacuum and gas flushing controllable by digital controller.
- .Germany made vacuum pump used(BUSCH.100m/h)
- .Insert gas connector for gas flush.
- .Residual oxygen level :up to zero.

OPTIONAL

- .Date Printer/ Coder

AUTO QUANTITATIVE PISTON FILLING MACHINE

FEATURES

- Speed and volumn adjustable for quantitative filling.
- Easy for cleaning and operation. No skilled technique required.
- Mechanism contacting the material is made of stainless steel.
No worry about corrosion.
- Both auto continuous filling and semi-auto foot switch control.
- Can be also used with automatic machine for on-line control.

APPLICATION RANGE

- Suits for filling high or low concentration materials.
- Royal Jelly, Honey, Salad, Bean Sauce, Cream, Soy Milk, Oil, etc.
- CHEMICAL INDUSTRIES: Chemical, Shower, Cream, Perfume, Essence, Lotion, Ink, Oil, etc.

AUTO CONVEYOR INDUCTION CAP SEALER

FEATURES

The power supply and sealing coil is mounted to an additional 1.5 meter long conveyor with swivel casters making it a completely stand alone system. Durable conveyor main construction is built by stainless steel with adjustable conveyor rails for different bottle sizes.

TS-2000-HAC

SEMI-AUTO INDUCTION CAP SEALER

FEATURES

Compactly constructed and effective sealing performance. This machine is designed for small factories, low quantity production and laboratory application.

MANUAL FILLING MACHINE

FEATURES

- . Design with siphon tube filling method.
- . Liquid level is controlled by floating ball.
- . Easy to install and operate
- . Suitable for glass bottle and plastic bottle
- . Storage tank feature automatic elevation, making the machine suitable for various shapes of bottle.
- . Easy to install and operate. The filling heads are easy to dismantle for washing.
- . Positioning filling reaches to standard level according to required capacity.
- . Suitable for various shapes of glass bottle.

FULLY AUTO QUANTITATIVE FILLING & CAPPING MACHINE

FEATURES

- . The machine is constructed of six filling heads and one capping head.
- . Filling head features convenient dismantling and washing.
- . Volumetric filling design permits filling to the desired quantity according to bottle capacity.
- . The machine is equipped with a magnetic variable torque regulator, providing easy adjustment of torque. Also available to equip with capping equipment for aluminum cap.
- . Suitable for filling and capping operations for glass and plastic bottle.

FEATURES

This automatic vacuum flattening machine saves loabors and suitable for packing of all kinds of beans and rice. With this packing machine no sticker is required any more, and a vacuum treatment can be secured . After vacuum flattening, the crops in bags will look beautiful, neat and easy to pile up on the display stands .

The storage life of the crops treated by this machine will be several times of the ordinary package.

AUTOMATIC VERTICAL FORM FILL PACKAGING MACHINE

FEATURES

- . Photo-cell controlled Printing Point Tracing System ensures extremely accurate bag forming, sealing and cutting performances.
- . This unit can perform either three sides sealing, four sides sealing or pillow type packaging. Specify desired packing choice when ordering.
- . Equipped with a product counting device.
- . All components in direct contact with the product are made of stainless steel, conforming to sanitary standards.
- . Convenient package size & packing speed are adjustable. Adjustment can be made while the machine is running.
- . The entire procedure from weighing, bag forming, filling and sealing to cutting and packaging is fully automatically operated.
- . Date coder available on request.
- . When required the material feeding mechanism can be built with a mixer and vibrator to provide an extremely smooth flow that will solve the packaging problem of difficult flow product.
- . Machine can be made to customers' own specifications on request.

OPTIONAL EQUIPMENT

- . Automatic quantity warning device.
- . Automatic date puncher.
- . Easy opening device.
